

SDC - INCUBATION FACILITIES

The Saveetha Dental College's incubator center offers a variety of business and technical services, initial seed money, lab facilities, advisory, network, and linkages to help entrepreneurs develop their businesses and address challenges that arise from time to time, especially in the early stages. The center exists solely to support the development and expansion of new businesses. It serves as a platform for young people and new-age entrepreneurs to develop their creative ideas into workable business proposals for implementation, where job creators consciously transform into job seekers.

The Saveetha Dental College runs a non-profit incubator with a plan to house the non-profit infrastructure needed for significant impact and long-term growth. It creates a fundraising strategy for nonprofits that is effective and upholds moral leadership. It offers market research, connections to strategic partners, access to bank financing, assistance with regulatory compliance, and other services with the varied goals of assisting non-profit enterprises flourish.

It contributes to the creation of jobs, income, and businesses that are in line with current priorities. It also promotes innovation, entrepreneurship, and idea incubation while offering a platform for the quick commercialization of technologies. By offering entrepreneurs affordable, value-added services including mentorship, legal, technical, and intellectual property-related services, it also contributes to the development of a thriving startup environment.
