

SDC - PLACEMENT CLUB

At Saveetha Dental College, we always work to foster an atmosphere where each person is motivated to venture outside the bounds of the academic and administrative fields to discover other horizons. Our placement and internship cell was developed and established with the intention of allowing students to make use of the academic and professional preparation they had obtained at university in the legal environment.

Internships are typically taken up by students between semesters in order to enhance their classroom instruction with real-world experience. The placement cell strives to make sure that each employer leaves the institution with the appropriate candidate and that students obtain the placements and internships of their preference.
